

NiRo UW-I-Told-You-So

I should have told you from the very start that I'm not into you. I'm not taking this seriously and so shouldn't you. I could never really understand what's going through your mind.

I can feel no chemistry, even if you're so sweet to me. I never told you you're the only one, never promised my heart. I never thought you would fall for me from now on we're apart.

I wish you could embrace my love, so please don't leave. I wanna live. Then I'll fall twice to show how much you mean to me.

It might not always be so hard just to express how much I feel. I'll be gone, goodbye so long. What's so difficult with someone like you? Why don't you understand? Wish every moment you can reminisce, not a full blown romance.

Just acknowledge that I won't give in, there's not a single chance. Keep your dreams, then move on. You just have to carry on.

I never told you you're the only one, never promised my heart. I never thought you would fall for me from now on we're apart. I wish you could embrace my love, so please don't leave.

I wanna live. Then I'll fall twice to show how much you mean to me. It might not always be so hard just to express how much I feel.

I'll be gone, goodbye so long. You are the only one for me, boy, so don't ever pretend. Get your comfort from somebody else, there's plenty of all in all.

May your heart rest those memories so you can move on. I never told you you're the only one, never promised my heart. I never thought you would fall for me, so what can I say? I wish you could embrace my love, so please don't leave.

To show how much you mean to me. Now it's so hard just to express how much I feel.
