

NiRo NV-Never-Was-A-Doubt

You're away from me for a while Every passing hour I find it hard to be Far away from you
Another day Time, time won't ever steal What we share You and I agree Whether here or there
The time has come and we Never lost a day when We would be together Now Run and show me
how Sunning from a cloud Coming from the never Darling now Falling from the crowd Love
each other now Loving you forever Forever and ever Now that we've found our way to we
Where to share Like the time was always new And never in the way And there was not a time Or
a day that we would Never be together Now Run and show me how Sunning from a cloud
Coming from the never Darling now Falling from the crowd Now Love each other now Loving
you forever Now There never was a doubt So turn around The sun is out The time is here Now
Run and show me how Sunning from a cloud Coming from the never Coming from the never
Run and show me how Sunning from a cloud Coming from the never Darling now Falling from
the crowd Love each other now Loving you forever Darling now Falling from the crowd Love
each other now Loving you forever Now Forever and ever Now Now Love each other now
Loving you forever Now
