

NiRo UW-Separate-Ways

Without you by my side, trying to find my peace of mind again, oh yeah. I'm waiting for you everyday, being with you is more than paradise, oh, I swear. Now we live our separate lives, I feel the cold inside, try to put your hand in mine, without you there's no love.

Passing all these words we've said, I miss your precious body next to mine. All I need is what you are, can't you hear me calling through the night? Hope to hurt you babe, I never meant, I swear. Now we live our separate lives, I feel the cold inside, loneliness is all around, without you by my side.

I can't deny the way I feel, the way it hurts inside. Without you there's no love. Now we live our separate lives, I feel the cold inside, loneliness is all around.
