

NiRo UW-Somebody-New

Softly you told me what I already knew I could see it in your eyes, feel it in your touch You know I've been waiting for this moment to come But it's still a big surprise when you say these words of love Wanting to tell you for such a long time I just didn't have the courage, you were always on my mind It's you I want baby, so now take a chance Cause I'm so tired of feeling scared to say I love you Hold me, should we take this chance forever Even though we know it's hard We'll come through this thing together Waiting for a love so strong And I know we'll make it work Cause I don't wanna look for somebody, somebody new Now that we've spoken About the way we feel By the time we made it happen It's by the time we made it real Take me in your arms And kiss me once again I need to know that you are with me Till the end Hold me, should we take this chance forever Even though we know it's hard We'll come through this thing together Waiting for a love so strong And I know we'll make it work Cause I don't wanna look for somebody, somebody new Should we take this chance forever Even though we know it's hard We'll come through this thing together Waiting for a love so strong And I know we'll make it work Cause I don't wanna look for somebody, somebody new
