

NiRo MR-Still-It-Goes

You ask me how are you, wonder what you do, it's been a long time. Surprised you asked for news, mind so fast and cool, you know I'm always fine. Where have you been throughout those years, did you know you left me down to tears when you went away that day.

Still it goes, still it flows and no one knows. Still it goes, still it flows and no one knows. Was meant to be, that you and me were lovers or just friends.

No one is to blame, our destiny seemed heavy, different plans. Where have you been throughout those years, still it goes, still it flows and no one knows.
