

NiRo UW-The-Same-Melody

The first moment I held you close, saw your tender face and I realized, I'll always be there for you. You're my angel girl, hope your dreams come true. From the first to the last beat, I'll sing for you.

From the first to the last breath, I'll be with you. Together we'll sing in the key of love. I never thought I would have someone like you.

I never thought we'd be singing like we do. Who'd never thought that we're sharing the same melody. Times you'd hold me in your arms, tenderly keeping me safe from harm.

I just wanted you to know, you're my special hero, wanted to tell you so. From the first to the last beat, I'll sing for you. From the first to the last breath, I'll be with you.

Together we'll sing in the key of love. I never thought I would have someone like you. I never thought we'd be singing like we do.

Who'd never thought that we're sharing the same melody. Hold my little hand tight, I don't let go. Hold my old hand tight, I don't let go.

The years are passing by, but our love will never run dry. I never thought I would have someone like you. I never thought we'd be singing like we do.

I never thought I would have someone like you. I never thought we'd be singing like we do. Who'd never thought that we're sharing the same melody.
